Asgn 4 Demo Specs (& Related Notes)

<u>**WHAT TO DO FOR THE DEMO**</u>
1. Delete Log.txt file
2. Run the program which MUST use InputStream.csv
   (and NOT the FakeInputStreamWithFakePV file)
3. Print out Log.txt file   (DO NOT EDIT THE FILE - except you can change the
   orientation and font and fontsize so there's no wrap-around – it MUST use a fixed-width
   font like Courier so that things align!)
4. Print out all your code files
5. Circle what's designated below (by hand).

<u>**WHAT TO HAND IN**</u>   **(in the order specified below)**
1. Cover sheet (signed)
2. Printout of Log.txt file
3. Your code: (IN THIS ORDER)
        The main program file
        PriorityQueue class file
        any other code files/classes used in your project

<u>**WHAT TO CIRCLE IN CODE**</u>
• Data storage for the heap itself
• Any reference to the formulas for calculating the leftChildPtr, rightChildPtr, parentPtr
